

Digital Forensic - I

Practical II - Data Acquisition using FTK

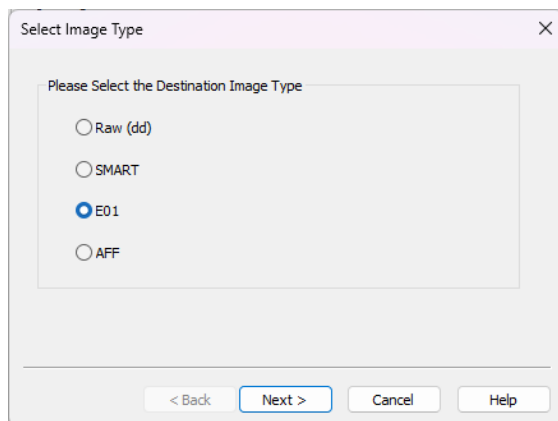

Step 1- Open exterro ftk image. On the LHS click onto file & go to create image disc & select physical drive & click onto next page

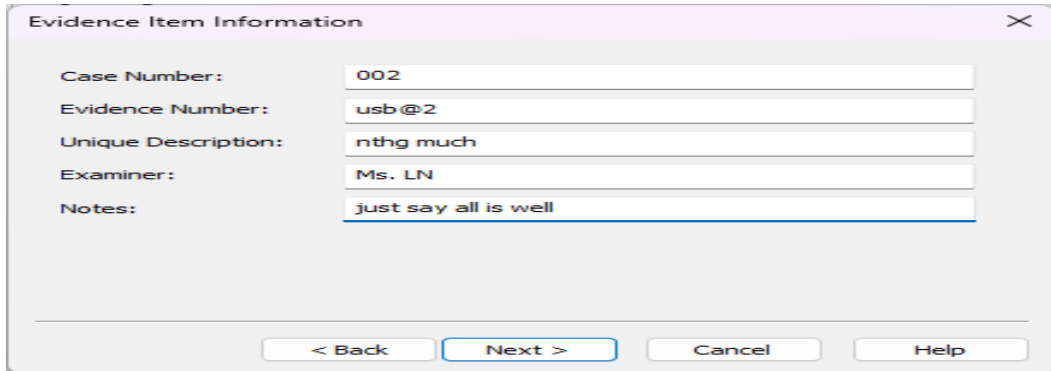

Step 2- Select your usb drive's path& finish

Step 3- select E01 type

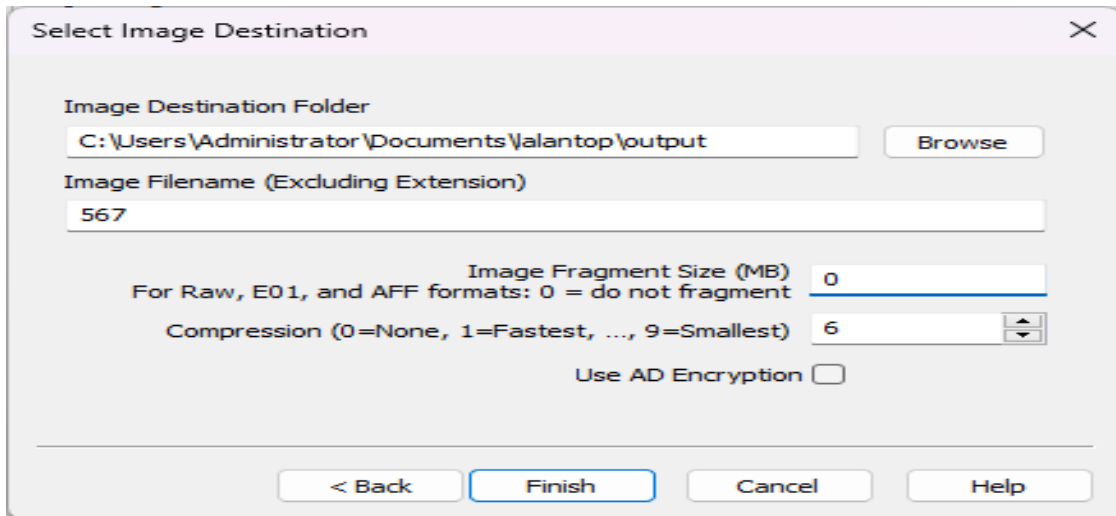

Step 4- Fill the information

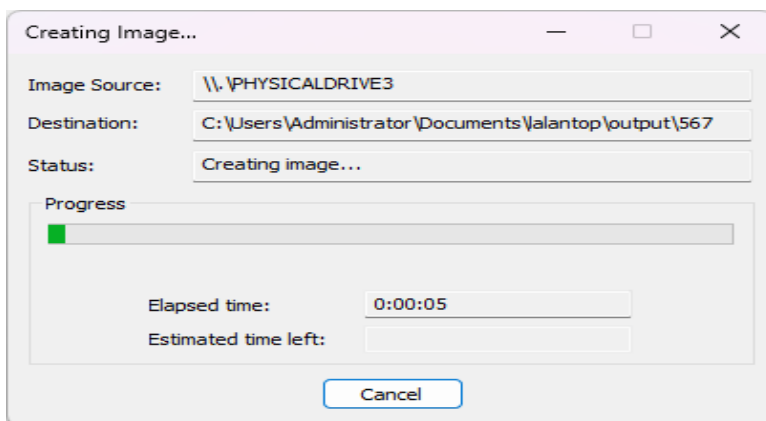

A dialog box titled "Evidence Item Information" with a close button (X) in the top right corner. It contains five text input fields with the following values: Case Number: 002, Evidence Number: usb@2, Unique Description: nthg much, Examiner: Ms. LN, and Notes: just say all is well. At the bottom, there are four buttons: "< Back", "Next >", "Cancel", and "Help".

Step 5- Select the path of output folder, write any filename & at image fragment size by default there will be 1500 but rewrite into 0 then finish.

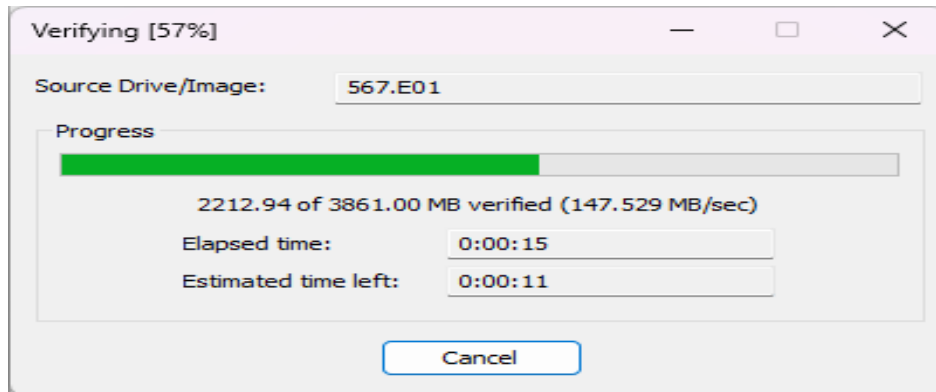

A dialog box titled "Select Image Destination" with a close button (X) in the top right corner. It contains the following fields and controls: "Image Destination Folder" with the text "C:\Users\Administrator\Documents\alantop\output" and a "Browse" button; "Image Filename (Excluding Extension)" with the text "567"; "Image Fragment Size (MB)" with a text box containing "0" and a note "For Raw, E01, and AFF formats: 0 = do not fragment"; "Compression (0=None, 1=Fastest, ..., 9=Smallest)" with a dropdown menu showing "6"; and "Use AD Encryption" with an unchecked checkbox. At the bottom, there are four buttons: "< Back", "Finish", "Cancel", and "Help".

Step 6- Then wait for few seconds

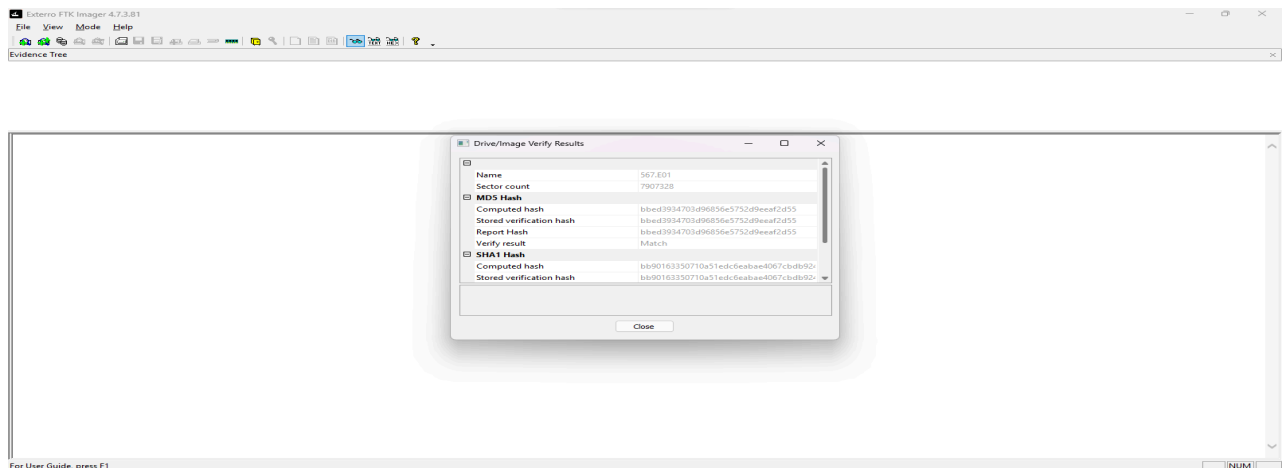

A dialog box titled "Creating Image..." with standard window controls (minimize, maximize, close) in the top right corner. It contains the following fields: "Image Source" with the text "\\.\PHYSICALDRIVE3"; "Destination" with the text "C:\Users\Administrator\Documents\alantop\output\567"; and "Status" with the text "Creating image...". Below these is a "Progress" section with a green progress bar that is approximately 10% full. At the bottom, there are two text boxes: "Elapsed time:" with the value "0:00:05" and "Estimated time left:" which is empty. A "Cancel" button is located at the bottom center.

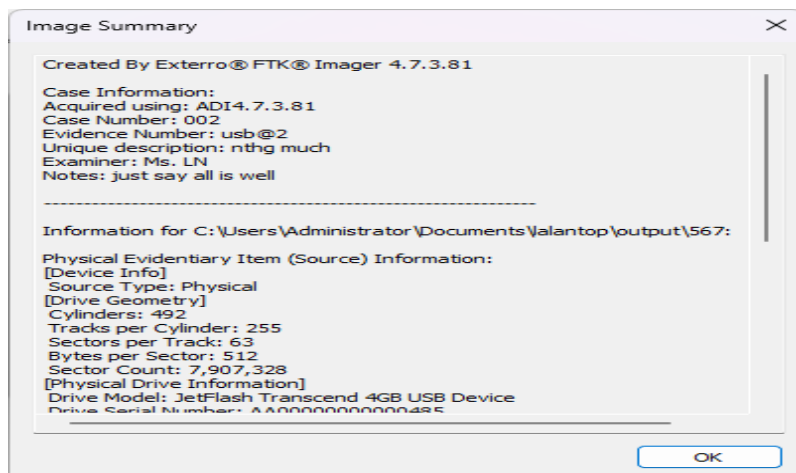

Step 7- Verifying the image will take some time

Step 8- This is the hash functions of the

Step 9- This is the image summary

Step 10- Then click onto add evidence option, then click onto image files, then select the path of output folder then this page will occur. Here there are two folders i.e root & unallocated data. In root folder there are sub folders i.e the one we saved & system volume info entire drive's info. In unallocated data we can recover the deleted files.

The screenshot shows the Extoro FTK Imager 4.7.3.81 interface. The Evidence Tree on the left shows the following structure:

- Partition 1 [3859MB]
 - NOT_VIRUS [FAT32]
 - root
 - super secret folder don't touch this please
 - System Volume Information
 - [unallocated space]
 - Unpartitioned Space [basic disk]

The main window displays a hex dump of data. The first few lines of the hex dump are as follows:

```
